MAIN PROJECTS

Fembot (v3.1.1) - Archived

Fembot is a general purpose Discord bot that I've built via Discord.py / Discord API. This bot is a hosted and feature rich project developed for a client.

Rolling Hills Vet Portal

This WinForms application is built in VisualBasic./Net, utilizing a locally stored MSSQL database. This project is feature rich and scalable.

Developing a Programming Language (CharrLang)

Ongoing project(s) in development of Pythonic compiled language and interpreted Kotlin-esque language.

EDUCATION

Degree — Computer Engineering (Programming/Database)

Certifications — Computer Science

- Python ZTM Developer
