MAIN PROJECTS

Fembot (v3.1.0)–

Fembot is a general purpose Discord bot that I've built via Discord.py / Discord API.

It is hosted on a home server, and has been cultivated for several years to achieve the desired results of those who originally commissioned the creation.

Rolling Hills Vet Portal–

This project was the final project of my Visual Basic/.NET class and earned a grade of A (100).

It aims to be the Vet-Technician's portal for customer / pet account creation, and provides a vast array of features such as appointment creation, admin controls, appointment review, and emailing patients based on the created appointment.

EDUCATION

Spartanburg Community College, South Carolina —
Computer Science, Programming (and Database)

Udemy Coding Bootcamps, Online — Computer Science

- Python Intermediate to Expert
- Data Structures & Algorithms

RECENT EXPERIENCE

Petsmart, Spartanburg, SC– Associate

June 2021 – December 2021

Registry work, occasional animal handling, general knowledge of dog & cat basic necessities.

creation, admin controls, appointment review, and emailing patients based on the created appointment.

PROGRAMMING SKILLS / RELATED EXPERIENCE

Primary Skills:

Python, C#, VB /.NET
(WinForms)

Secondary:

Java, HTML/CSS, Javascript,
Kotlin

SQL:

SQLite, MSSQL, T-SQL,
NoSQL, Mongo

Git:

Primarily VCS with GitHub,
have worked some with
GitLab. I'm experienced with
using this tool in a team
setting.

Preferred IDEs:

JetBrains for most things
excluding niche .NET projects,
DataGrip for all SQL /
dataview projects.

Visual Studio is last on my list
of preference, but it works;
VSCode is locked away in a
closet, never to be used again.
